

MEDICAL STUDENT ROTATIONS AT THE MID-HUDSON FAMILY PRACTICE RESIDENCY PROGRAM

Medical students rotate at our various clinical sites including the Institute's federally qualified health center sites in Kingston, New Paltz, Ellenville, Hyde Park and Port Ewen; Health Alliance of the Hudson Valley Broadway Campus (The Kingston Hospital); and Ellenville Regional Hospital. We offer third year rotations in family medicine and fourth year electives in family medicine and inpatient medicine.

Priority will be given to those students documenting an interest in family medicine as well as those who demonstrate a commitment to the Institute's mission. We value diversity and encourage applications from members of underrepresented groups. We generally accept up to three visiting medical students per period.

At least three months prior to the requested rotation date, complete and submit the following materials:

- An [application form](#)
- A [clinical placement agreement](#)
- A completed [initial health assessment form](#)

Completed applications should be sent to Ms. Yisaira Mendez, Student Program Coordinator, Institute for Family Health at [ymendez \[at\] institute.org](mailto:ymendez@institute.org).

Applications will be reviewed by the Director of Medical Student Education; the student and their medical school will be notified as to whether the rotation has been approved.
